

March 22nd 2011

TO ALL CONCERNED,

Nittoku Engineering Co., Ltd.

Nobushige Kondo

Representative Director & President

Influence of the “2011 Pacific Coast Tohoku Earthquake” On Our Group

---Second report---

We would like to express our deepest sympathy to all casualties those who have been affected by the “2011 Pacific Coast Tohoku Earthquake” on March 11th 2011.

Previously on March 12th, we have reported that there are no major damages to our facilities at Fukushima.

After the calamity, Fukushima factory had gone through a shortage of infrastructure and logistics. Even for the workers there was a shortage in daily commodities.

On the way, the shortages have started recovering and we decided to restart the normal operation in Fukushima factory from March 23rd.

We are very sorry to bother you for a long time.

Regards
